BISTECH PTRM API

Throttling Details
Document

October 2022

1. Throttling Details

PTRM API users' requests to the provided services will be limited to a certain capacity (Throttling). A user will be able to send a certain number of requests for each service in a certain time interval and will receive an error message (HTTP 429 – Too Many Requests) when the capacity is exceeded. Current throttling values are listed below.

Service Type	Service Name	Max Request Count	Refresh Interval (seconds)
GET	(*) All Get Requests	10	60
POST	/api/v1/auth/login /api/v1/auth/refresh-token	No Throttling	
POST	/api/v1/txn/userlimit/block-group /api/v1/txn/userlimit/mass-cancel /api/v1/txn/userlimit/mass-cancel-for-user /api/v1/txn/userlimit/unblock-group /api/v1/txn/userlimit/unblock-order-rate /api/v1/txn/userlimit/unblock-tradable	1	10
POST	/api/v1/txn/userlimit/save-active-group /api/v1/txn/userlimit/save-pending-group	1	600
POST	/api/v1/txn/userlimit/daily-save-active-group /api/v1/txn/userlimit/daily-save-pending-group	1	60
