Subject: Announcement about the free float ratios which are used both in determining of index constituents and index calculations

To Whom It May Concern,

Matters regarding the use of the free float ratios (FFR) in determining and calculating the shares to be included in the BIST Stock Indices are specified by the BIST Market Cap Weighted Stock Indices Methodology (Methodology).

Taking into account the effective date of the Capital Markets Board of Türkiye's (CMB) decision—announced in Bulletin No. 2026/35 dated June 5, 2026—regarding the determination of the FFR concept for companies whose shares are traded on the Borsa İstanbul Equity Market, following matters has been decided;

- In determining the scope of indices effective as of July 1, 2026, the FFRs as of the last day of May, as directed in the article 2.16 of the Methodology, shall be replaced with the FFRs as of June 15, 2026, announced by the Central Securities Depository and Trade Repository of Türkiye (MKK) in accordance with the principle decision included in the CMB's Bulletin dated June 5, 2026,
- In the review of the FFRs of shares currently included in the indices, instead of the FFRs announced by the MKK for the last business day of the week as stipulated in the article 5.2.f.i., it has been decided to use the FFRs announced by the MKK on June 15, 2026, in accordance with the principle decision included in the CMB's Bulletin dated June 5, 2026, rather than the FFRs announced by the MKK for the last business day of the week.

The announcement can be accessed from the “Index Announcements” section of Borsa İstanbul's corporate website ([www.borsaistanbul.com/en](http://www.borsaistanbul.com/en)).

Kindly submitted to your information.

Sincerely,
